-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

**A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.**

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) Responsive to communication(s) filed on \_\_\_\_\_.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

*Drawings*

The drawings are objected to because in figure 2, the lead line for 21 should point to the motor end cover and not the base wall 12. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

*Specification*

The abstract of the disclosure is objected to because it contains the phrase "of the present invention" (line 5) which is implied and should be deleted. Correction is required. See MPEP § 608.01(b).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Boeckel 3,303,995. Note the ventilation unit having an electric motor 24 with an output shaft 22 that is fitted with a fan 10 having a cup-shaped central body 12 and plural blades 16, with the central body being defined by a base wall 13 and an annular wall 14 from whose outer face the blades extend, with plural through windows 26 formed in the annular wall, which inherently will channel out, in use, any condensate formed inside the central body. The through windows are formed close to the peripheral edge of the base wall. The through windows 26 are each formed in the gap between adjacent blades. The through windows are equally spaced.

Claims 1-3 and 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Braun 4,583,911 (figures 1-3 and 6-11). Note the ventilation unit 12 having an electric motor 30 with an output shaft 28 that is fitted with a fan 14 having a cup-shaped central body 16 and plural blades 18, with the central body being defined by a base wall 20 and an annular wall 24 from whose outer face the blades extend, with plural through windows 26 formed in the annular wall, which inherently will channel out, in use, any condensate formed inside the central body. The through windows are formed close to the peripheral edge of the base wall. The through windows 26 are each formed in the gap between adjacent blades.
